

## **2 MACROMOLECULES AND MACROMOLECULAR COMPLEXES**

Scroll down the index below to find the macromolecule or macromolecular complex of interest.

Click on the relevant [\[APPLICATION SHEET\]](#) for a detailed protocol of the isolation or analytical procedures. All Application Sheets contain a full bibliography with links to abstracts and full papers (if available).

<b>Preparation of gradient solutions</b>	<a href="#">[APPLICATION SHEET M1]</a>
<b>Preparation of pre-formed gradients</b>	<a href="#">[APPLICATION SHEET M2]</a>
<b>Preparation of self-generated gradients</b>	<a href="#">[APPLICATION SHEET M3]</a>
<b>Plasma lipoproteins</b>	
<b>HDL, LDL and VLDL analysis</b>	<a href="#">[APPLICATION SHEET M7]</a>
<b>LDL subfractionation</b>	<a href="#">[APPLICATION SHEET M8]</a>
<b>Plasmid DNA purification</b>	<a href="#">[APPLICATION SHEET M6]</a>
<b>Proteins</b>	
<b>Buoyant density banding</b>	<a href="#">[APPLICATION SHEET M4]</a>
<b>Complex formation analysis</b>	<a href="#">[APPLICATION SHEET M9]</a>
<b>Sedimentation velocity analysis</b>	<a href="#">[APPLICATION SHEET M5]</a>
<b>Proteoliposomes (separation from proteins)</b>	<a href="#">[APPLICATION SHEET M10]</a>
